```
1 CASE 1 (DEMO mode):
```

3 No arguments detected, we will run DEMONSTRATION for your pleasure:

4 ------

5 -> First we will load a small text to our text storage:

7 the man in the row in front turnned when hee haerd his name called but he had no ideea who called him and he was woried mayby the polise were lookking for him so he ran and hid in the kar

-> Currently under the hood we store it like this:

```
10
11
                            ·○『woried』
12
                        - ●【no】
13
                    o [hid]
                      — ●【polise】
14
15
                  【was】
16
                       - ○ [mayby]
17
                    [had]
18
              [turnned]
19
                  — ●【in】
20
                【he】
                <u></u> - [but]
21
22
         [row]
23
                         ● 【front】
24
                           — ○ [were]
25
                      (man)
26
                         • [hee]
27
                  [who]
28
                       - \bullet [him]
29
                    ● 【for】
30
                           - • 【the】
31
                         o [so]
32
                           — ●【called】
33
              (his)
34
                          — o『kar』
35
                         • [ran]
36
                    o [ideea]
37
                       - •【name】
38
                  (haerd)
39
                           — o [lookking]
40
                         • [when]
41
                    o [caled]
42
                      — ●【and】
43
```

44 -> Then let's load a simple 50 words file as our dictionary:

46 woried no hid polise was mayby had turnned in he but row front were man hee who him for the so called his kar ran ideea name haerd lookking when caled and

48 -> Now let's filter the text using our new dictionary:

```
49
50 BEFORE:
51
                       caled
                              called
                                          for
                                                                                      hee
       and
                but
                                                 front
                                                            had
                                                                  haerd
                                                                              he
